View Systems Details Joint Venture with Trillacorpe Construction

Baltimore, MD – June 29, 2011 -- (MARKETWIRE) -- View Systems, Inc. (OTCBB: [VSYM](#)), a security and tele-data solutions provider, announced last week that a joint venture with Trillacorpe Construction is set to commence. The JV has been uniquely created to focus on electronic security design and installation throughout the federal contracting arena using Trillacorpe's existing platform and reputation and View's state of the art technology, not to mention its own reputation within state contracting arenas, specifically correctional facilities and schools.

One of the team's first targets is to assist the Department of Homeland Security's port security initiative. The team has selected Detroit, Michigan for its initial point of focus due to it being the world's busiest international border crossing. In addition, both View and Trillacorpe have independent, yet simultaneous work in Michigan. Equally notable will be the partnership's internal training program, specifically designated to retrain veterans and employ them nationally throughout the JV's schedule of work.

Gunther Than, CEO of View Systems, states, "Mr. Campanaro and I both contend that the longer term potential of the JV will be to draw on each firms' public sector and Fortune 1000 clients, other industries such as healthcare and energy that Trillacorpe is already diversified in, and naturally, the Federal Bureau of Prisons."

Trillacorpe's CEO, Frank Campanaro, says, "This is not only wise to utilize military personnel who already carry security clearances and inherently operate securely through their unparalleled training and dedication to national security, but having a highly trained, seasoned work force is a unique and competitive advantage. It is also the right thing to do and we take great pride in retraining and employing our nation's veterans."

About Trillacorpe Construction: Trillacorpe Construction is a Michigan headquartered, nationally based, certified Service Disabled Veteran Owned Small Business (SDVOSB) that provides construction, architecture and engineering, and consulting services with extraordinary quality and customer satisfaction. Trillacorpe Construction's powerful network of high-level military and political contacts, along with its stellar performance record, is quickly vaulting the company into the upper echelon of the ever-expanding government contracting sector (ranked 26th by Federal Times 2010). Trillacorpe's financial reports show \$1.5 million in first year sales (2008), \$15 million in 2009, and \$28 million in sales to date for 2010, with \$18 million pre-sold for 2011. More information can be found at www.trillacorpeconstruction.com.

About View Systems: View Systems, Inc. manufactures and installs weapons detection identification systems, video management platforms and tele-data communication networks targeted towards correctional facilities, schools, courthouses, government agencies, event and sports venues, and commercial businesses. More information can be found at www.viewsystems.com.
