

The New LAW

Handheld Metal Detector

VIEW SYSTEMS

THE NEW LAW is the latest in high performance Handheld Metal Detectors

- Fully automatic
- Battery powered—uses one 9V Battery (Included.)
- High sensitivity search procedures with no physical contact with subject
- Multiple applications
- Designed to increase officer safety
- Adjustable sensitivity
- Low battery alert
- Precision monitoring
- Current drain: 8mA (min) - 60mA (max)
- Instant audible response to all metals
- Can be used flat for a wide scan area or on edge for pinpointing an object
- Can be set to alarm with tone and large LED light or just LED light
- Perfect for security screening

View Systems added the **LAW** Handheld Metal Detector to its product line due to a great level of demand from the correctional industry. Just recently, View adopted the NEW model LAW which is being offered at a dramatically reduced price-point. The NEW Law is a high-sensitivity metal detector that features rapid speed and high definition technology. Defining the benchmark for handheld detectors, the LAW makes a great addition to the ViewScan.

*Watch as the security officer in the photos uses **The New Law** to make sure the visitor is clear of any threat objects.*

*The visitor has just passed through the **ViewScan**, so in this case, **The New Law** is being used as an additional precautionary measure / pinpointing device to avoid a pat-down search.*
