View Systems Provides an Update on Network Services Contracts

BALTIMORE, MD -- (GLOBE NEWSWIRE) -- September 15, 2010 -- View Systems, Inc. (OTC BB: [VSYM.OB](#)), a security and tele-data solutions provider, issued an update today on the progress of its Network Services Division.

The company's Network Services Division has completed the task of running fiber optic pathways to a 99-unit senior citizen housing complex in Odenton, Maryland.

In addition, another job commenced on September 7 during which the team began running fiber optic pathways to 59 units at the Woodley Garden Townhouses in Rockville, Maryland. The fiber optic pathways that are being installed will later be used to run Verizon FIOS.

Paul Price, Vice President of View's Network Services Division, states, "View's Network Services team has been selected to run these fiber optic pathways due to our neat, clean working style and our ability to meet and exceed the contractor's expectations. In addition to running fiber optic pathways, we are also promoting our digital video surveillance systems with wireless camera arrays to marinas, restaurants, warehouses, and other businesses. We look forward to installing our surveillance system into various local businesses, and to carrying out additional fiber optic jobs."
