View Systems Sets Record Earnings in Second Quarter

BALTIMORE, MD — August 15, 2007 -- View Systems, Inc. (OTC BB:[VYST.OB](#) - [News](#)), a leading security products manufacturer and solutions provider, announced today that the firm became cash flow positive for the quarter ending June 30, 2007. As a result of additional products, faster delivery, increased marketing, lower cost of product delivery and wider distribution, the company boasts a positive cash flow this quarter and is closer to long-term profitability.

View is reporting revenue to date, 2007 of \$961,769 up 54% over six months to date last year. Cost of sales decreased from 51% to 39% due to the result of economies of scale achieved through larger quantity purchases at lower unit costs. The effect is a 90% increase of gross profit from \$306,239 to \$582,988. Additional increases of sales should produce even greater margins.

Total operating expenses also decreased both year to date and quarter to date. The company is delivering product faster due to receivables and cash infusions applied directly to manufacturing allowing for faster delivery. Retrofitted positive ID/biometric capability add-ons enhance existing customer re-occurring revenue at highly desirable margins. Service, installation and training has doubled from \$24,264 last year to date to \$50,309 this year to date.

Gunther Than, CEO of View Systems, states, "The second quarter has seen very positive developments: the debut of the new battery-operated, portable (less than 30 lbs. and fits in a golf bag case), rugged SecureScan-P that out-performs the competition; a cell phone detection system; IED/bomb detection; and a second party liquid explosives detector.

"View has addressed the need for recognizing IEDs (Improvised Explosive Devices) by partnering with the premier millimeter wave sensor manufacturer. View markets a stand-off passive [Millimeter Wave Imaging System](#) with sensors and imaging technology built by Xytrans, Inc., a partner solutions provider. The imaging system can rapidly 'see' at 15 feet concealed weapons, IEDs, plastics, liquids, concealed contraband such as illegal drugs and even hidden compact disks (CDs).

"We are still developing nuclear sensor technology to integrate into our SecureScan and new more compact Visual First Responder products. We have continued to explore international markets and are establishing relationships with distributors and dealers abroad. We have entered into a definitive agreement to acquire a service company, Sigma International Holdings, Inc., (www.globalsigma.com), which has significant revenues and a cadre of consultants that will be of great benefit to enhance the distribution of View's products."

###

About View Systems, Inc.
